To Whom It May Concern:

I received a request from Ms. Kenia Castro from Leon, Nicaragua for more information concerning her prosthetic care. She is a 26 year old female, working professional who is also a bilateral amputee. She is interested in new prosthetic technology available here in the United States. She believes this technology may help her complete activities of daily living and work activities as a teacher in Nicaragua.

My office has offered to evaluate her current prosthesis, discuss new prosthetic technology and educate the patient about prosthetic care. We may possibly make minor repairs to her current prosthesis. After working with us here, the patient will then be able to make an informed and educated decision about her lifetime prosthetic rehabilitation in Nicaragua.

If you have any questions, you may call me at my office, 203-377-8820.

Sincerely,

Nathan P. Seversky, CP
